

XM should be allowed to offer all the services they currently do. Weather and traffic is one of those services that I pay for an use daily. I benifit greatly from the info given. Xm offers more variety and more entertainment than any other source and I pay for that. Being the consumer I dont think the NAB should make decisons as this. I hope the FCC rejects NAB's petition 04-160 and that the FCC also supports XM ability to provide me with the programming that I want .
Thanks
